WARNING: Failure to use any or all of the devices or systems explained or illustrated in this article in an appropriate manner could result in property damage, injury or death. Expert instruction and constant practice are mandatory. This is not an instructional article. It is designed to accompany professional instruction and practice under supervision.

Initial Impression

The climber pictured has just held a fall by her partner. Assuming that her partner was injured, what should her initial thoughts and action plan be?

The climber has decided to perform a raising rescue. Describe the steps that are being done in each picture in the sequence:
